- ▶ **CHEAPER TO TRANSPORT**

Featuring ultra reflective high gloss surfaces, EGR Whiteboards are the perfect solution for cutting-edge interior fitouts. They're available in a huge range of designer colours and textures, and a virtually unlimited range of sizes – from clipboards to full wall cladding.

EGR Whiteboards are made from high quality acrylic, and look just like back painted glass. They use Dry Wipe or Liquid Chalk markers. Vibrant and widely available, these markers allow for eye-catching colour contrasts, feature low-odour usage, and make for an environmentally responsible non-toxic system. A 5 Year Indoor UV warranty is included on every EGR Whiteboard.

Custom colours are available, subject to panel sizes and minimum order quantities.

CLEANING

The acrylic high gloss surface will not be affected by the repeated use of Dry Wipe or Liquid Chalk markers as long as the correct cleaning procedures are adopted:

- Only use soft microfibre cloths to wipe off the ink.
- Do not use solvent based markers or whiteboard cleaning solutions at any time.

INSTALLATION

EGR Whiteboards install easily using included double-sided tape. Combined with the unique acrylic panels, this allows for installation without frames or fixings, resulting in a perfect, unspoilt surface.
